

# October **PARTicles**

The newsletter of PART of Westford, MA – WB1GOF

*Celebrating 40 years of public service 1975-2015*

## President's Column

---

### - Andy Stewart (KB1OIQ)

The contributors to PARTicles took a well deserved break over the summer. Now that fall has arrived, and our batteries have been recharged, we're looking forward to creating this, and future, issues of PARTicles for your reading enjoyment.

June: Field Day: As usual, it was very well attended and people had a great time. George (K1IG) gave us an informative presentation shortly after Field Day, and Rick (W1RAG) shared with us his unique perspective in his "Field Day Retrospective", a.k.a. the "Silly Slideshow".

September: Boxboro: There was a lot of participation from PART at this event, including fox hunting (John KB1MGI), satellites (Bob KB1SWZ), and BITX/uBITX (Andy KB1OIQ)..

More recently, we had our annual election of officers. Many thanks to Rich (AB1HD), Steve (W1KBE), and Rick (W1RAG), who served for many years on the Board. Joining the Board as Director-at-Large is Bob (W1IS). Our newly elected Vice President is George (K1IG), and our new secretary is Chauncey (K1OPE). Rounding out the Board is your incumbent President Andy (KB1OIQ), and incumbent treasurer Alan (W1AHM).

We've already had one Board of Directors meeting, and it is clear that the new Board members bring a lot of energy and ideas to the meeting. We're working together to bring the new Board members up to speed regarding club operation and history. Stay tuned...I think you'll see some exciting and needed changes coming soon.

The club functions best when a lot of people are involved. As often happens, a small percentage of people shoulder a large percentage of the work. I want to be sure that those folks don't burn out, so let's give them some help where we can.

We have several areas where people can help make the club even better:

- \* Website: Our webmaster, Rich (AB1HD), is looking for help with the club website. If you have software skills and talent with website creation, please contact Rich.

- \* Membership: If you would like to be more involved with membership and guiding new club members, please contact our Membership Chairman Hugh (N1QGE). This is important if we are to sustain our membership numbers and remain a vibrant club.

- \* Christmas/Holiday Party: many thanks to Chauncey (K1OPE) for stepping up to help Hugh (N1QGE) with this popular annual event. We could use one more person to help here. Please contact Hugh or Chauncey if interested.

With the dearth of sunspots, I've been focusing my personal energy on several different projects. I'm finishing up my uBITX work and adaptations for the visually impaired. With a huge amount of help from Steve (W1KBE) and Allison (KB1GMX), the restoration of a Guild Spice Chest Radio is now complete. I plan to spend my upcoming free time updating "Andy's Ham Radio Linux".

In addition, plans are well under way for the next kit building activity. Steve (W1KBE) is leading this effort. The goal is to bring an Arduino based kit build and learning series to interested members. The focus will be for newcomers to the Arduino, and will involves soldering, hardware, and software geared toward ham radio applications. After the initial building of the kit, this has the strong potential to turn into an Arduino special interest group within PART.

Have a lot of fun, and 73!

Andy (KB1OIQ)

**October 2018**

# Treasurer's Report

## PART Treasury Reports

PART member donations have been greatly appreciated in the past and we hope to continue this great community service at every meeting.

## Monthly PART Meetings Minutes

### Minutes PART meeting September 18, 2018

- *Cameron Senior Center, Westford, MA*

7:30 PM – 9:30 PM

Officers Present: Andy, KB1OIQ, Pres; Rich, AB1HD, VP; Rick, W1RAG, Secretary; Alan, W1AHM, Treasurer; Steve, W1KBE, Director at Large

Participants: 34

KB1OIQ opened the meeting with the usual round of introductions.

- He then introduced Alan, K1ALL, who presented the nominations for the year 2018-2019 club officers: Pres - Andy, KB1OIQ: VP - George, K1IG; Secretary - Chauncey, K1OPE; Treas – Alan, W1AHM
- All were seconded and voted in unanimously.
- KB1OIQ thanked the outgoing leadership and welcomed the new people.
- Incoming Director at Large is Bob, W1IS, who will succeed W1KBE.
- AB1HD, Webmaster, is seeking a successor.
- W1KBE will lead the Kit Building session.
- Greg, N1DAM, has taken the lead for arranging speakers for our meetings.

Hugh, N1QGE, is seeking assistance and suggestions for the 2018 Holiday Dinner. This party is in lieu of the regular third Tuesday night meeting in December. He also thanked everyone for their donations to the Food Pantry.

N1QGE still is holding a number of unclaimed PART badges for new members.

W1AHM gave the Treasurer's Report. 92 members to date. Balance in the cash account is \$12,076.

W1AHM acknowledged the help received from all of the Boxboro convention volunteers.

Bill, K1NS, spoke on how he got an out-of-state vanity automobile license plate. Good only for personal collections.

We had two speakers this evening:

- John, WB2OSZ, gave a talk on his DireWolf open source software which is a 'software soundcard AX.25 packet modem/TNC and APRS encoder/decoder. It can be used stand-alone to observe APRS traffic, as a tracker, digipeater, APRS gateway, or Internet Gateway (IGate).' WB2OSZ's slides will be available on the WB1GOF website shortly.
- Wrapping up the meeting was Rick, W1RAG, who gave us a creative and humorous look at the 2018 PART Field Day event in Concord.

Another enjoyable and informative meeting.

See everyone next month.

73

Chauncey, K1OPE

## Special Event

### Jamboree On The Air - October 19-21, 2018

Jamboree-on-the-Air, or JOTA, is the largest Scouting event in the world. It is held annually the third full weekend in October. JOTA uses amateur radio to link Scouts and hams around the world, around the nation, and in your own community. This jamboree requires no travel, other than to a nearby amateur radio operator's ham shack. Many times you can find the hams will come to you by setting up a station at your Scout camporee, at the park down the block, or perhaps at a ham shack already set up at your council's camp.

Scouts of any age can participate, from Cub Scouts to Boy Scouts and Venturers, including girls. Once at the ham radio station, the communication typically involves talking on a microphone and listening on the station speakers. However, many forms of specialized communication may also be taking place, such as video communication, digital communication (much like sending a message on your smartphone but transmitted by radio), or communication through a satellite relay or an earth-based relay (called a repeater). The exchanges include such information as name, location (called QTH in ham speak), Scout rank, age, and hobbies. The stations you'll be communicating with can be across town, across the country, or even around the world! The World Scout Bureau reported that the 2017 JOTA-JOTI had over 1.5 million Scout participants from more than 160 countries.

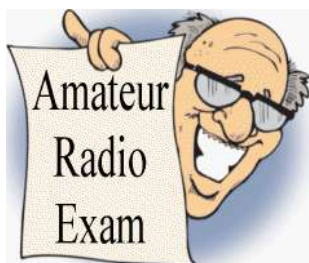

Jamboree-on-the-Air is held the third weekend in October. There are no official hours, so you have the whole weekend to make JOTA contacts. The event officially starts Friday evening during the JOTA Jump Start and runs through Sunday evening.

#### How Can I Participate as an Amateur Radio Operator?

Contact your local Scout council and see what may already be planned in your area and how you can help. You can find your council using the Council locator.

If nothing is currently planned, or if current plans aren't reaching your area, you can work with the council or a local unit (pack, troop, crew) to set up a JOTA station or arrange for visits to your ham shack. You can also participate just by making QSOs with the many JOTA stations that will be on the air. A good resource to find a local Scout unit is the Be-A-Scout website at .

The Billerica BARS VE team conducts VE Sessions on 2<sup>nd</sup> Thursday of every month. They are held in the church hall of The Chelmsford Bible Church, 128 Gorham St, East Chelmsford at 7pm. New license and upgrade tests. Walk-Ins, not a problem. No Reservations needed. For more information, contact: Gary W1GFF at 978-453-1100 [Email Gary W1GFF](mailto:Gary.W1GFF@billerica-bars.org)

## Special Event Stations in New England

### 10/20/2018 | USS Cassin Young 75th Anniversary

**Oct 20-Oct 21, 0900Z-1600Z, N1Y**, Charlestown, MA. USS Cassin Young Amateur Radio Club. 14.250 14.050 7.225 7.050. QSL. USS Cassin Young Amateur Radio Club, PO Box 214, Boxford, MA 01921. N1Y - This event is held in conjunction with the National Park Service and US Navy to recognize the 75th Anniversary of the Commissioning of the USS Cassin Young DD 793, a World War II Fletcher-class destroyer, and the birthday of the United States Navy. The USS Cassin Young is located at the Boston National Historical Park (HP-04) in Charlestown, MA. <https://www.nps.gov/bost/learn/historyculture/usscassinyoung.htm>

### 11/10/2018 | Sturdy Memorial Hospital ARC 40th Anniversary

**Nov 10-Nov 11, 1600Z-2200Z, W1S**, Attleboro, MA. Sturdy Memorial Hospital Amateur Radio Club. 14.260 7.225. Certificate. John Bellissimo KA1EWN, 376 High Street, North Attleboro, MA 02760. [www.sturdyradioclub.org](http://www.sturdyradioclub.org)

## Public Service Events

### Baystate Marathon/Half Marathon in Lowell - Sunday October 21, 2018

#### Assistance is still needed!

The Lowell CERT Communications Team has been asked to support once again the Baystate Marathon and Half Marathon. This year the event is on Sunday, October 21<sup>st</sup>. Our operational time period is from approximately 0700 until event completion (estimated 1400). Our assistance has been requested by Lowell Office of Emergency Management and Lowell Fire Department. The communications team will be employing Amateur Radio to provide this communications asset. Amateur Radio will be used for 2 functions:

- \* Medical operations: the purpose of this net is to provide a communications link for medical requests/status to the incident command post.

- \* Accountability net: the purpose of this net is to coordinate with a race public information booth the status of runners who are unable to complete the race for any issue to any one is seeking this information.

Race info may be found at <http://baystatemarathon.com/raceinfo>

Please contact Terry-KA8SCP ([KA8SCP@WB1GOF.org](mailto:KA8SCP@WB1GOF.org)) if you are able to assist or would like more information.

## PART Pumpkin Patrol in Westford - Wednesday, October 31, 2018

PART once again is providing the Pumpkin Patrol service to the Town of Westford. Many of you are veterans and others may be volunteering for the first time... whichever you are... thank you in advance for your help! Pumpkin Patrol involves the use of Amateur Radio volunteers providing additional eyes and ears to the Town of Westford during the annual Trick or Treat event. Our purpose is to observe and report any potential safety concerns back to the PART Pumpkin Patrol Net Control Station which will be located at the Westford Police station. A report from one of our patrols will get handed off to the Westford PD dispatcher and addressed by the Town's public safety services. Our role is ONLY to report what we see and provide input to our Town's public safety departments.

We normally require 5 - 8 radio operators per "shift" that will patrol various geographical sections of town. Maps and a checklist of locations to watch will be provided when you check-in for your assignment. Check-in occurs at the Westford Police station where we record your call sign and your vehicle information. You do NOT need to be a resident of the Town of Westford to volunteer, but a basic familiarity with the town's geography is a plus!

We have quite a few new hams and club members this year. If warranted, a meeting prior to the event may be scheduled. This will give our new folks and veterans a chance to interact and become comfortable with the operation.

The normal time for Trick-or-Treaters is 6 PM until 8 PM. Our activities have varied over the years, but we normally will run the operation from 5:30 PM until 10:00 - 11:00 PM. If the weather is lousy, the net closure time will be adjusted accordingly. We try and accommodate every individual's schedule, we have run with 2 shifts in the past... an early and a late shift. We will accept your offer to assist at any time throughout the course of the evening.

The plans are to use the WB1GOF 2 meter repeater, 146.955 (PL 74.4), for the entire event. So all a volunteer will need is a radio capable of operating on that frequency. A vehicle will help too... but if you don't drive and want to ride shotgun with another ham, we should be able to accommodate that as well. If you'd like to do a bike or foot patrol, please contact me and we could talk thru that kind of an operation. Contact Terry-KA8SCP ([KA8SCP@WB1GOF.org](mailto:KA8SCP@WB1GOF.org)) if you are interested or need more information.

### Amateur Radio News

From eHam.net News:

#### Radio Enthusiasts Tune In to Clark County Amateur Radio Club:

by columbian.com on October 8, 2018

It's hard to miss the Yassons' house -- just look for the tall radio mast coming out of the roof, with long, thin aerials extending like bare tree branches. Philip Yasson didn't say just how tall it was, but he said it was tall enough to worry his neighbor. "He says, 'Aren't you worried about it falling over?'" Philip Yasson said. "And I said, 'No, not really ... because I have it designed so if it falls over, it's going to fall on your house.'" Philip and his wife, Barbara,

ages 81 and 70, are among the 350 members of the Clark County Amateur Radio Club, a local group that has been committed to keeping the practice of amateur radio -- also called "ham radio" -- alive since the 1930s. Amateur radio involves using radio waves to communicate with other operators, noncommercially, whether they be in the next town over or halfway around the world. "Amateur radio is not a broadcast," said Barbara Yasson, also the CCARC's secretary. "It's a conversation between two people over the air." Amateur radio is more complicated than just turning on the receiver and waiting to pick up a signal. As with broadcast radio, messages are transmitted over a specific radio frequency and can only be received by operators who are tuned into the same frequency. And that's to say nothing of the rules and regulations that the Federal Communications Commission imposes on amateur radio. "We're licensed by the FCC, so we have to have a certain amount of competence and understanding about radio and rules," said Tim Kuhlman, the CCARC's president. "Then, with those privileges of the license, we're allowed to work on different radio bands and use a lot more power than, say, a lot of the other services." It's more often that amateur radio operators use their skills for community outreach and public engagement. Kuhlman said that local operators have helped out with Walk and Knock as well as the Veterans Day Parade. In 2016, the ARRL teamed up with the National Park Service, celebrating the latter's centennial with an event called National Parks on the Air. Barbara Yasson participated with her husband, setting up a station at the Fort Vancouver National Site.

### **Clyde Beal: A Hobby for a Lifetime, Ham Radio:**

by herald-dispatch.com on October 8, 2018

Fred Jones knew the International Morse Code Alphabet before he graduated from high school. Today, he's 74 and still finds the system of dots and dashes quite entertaining for communication as a licensed Ham Radio operator in Louisa, Kentucky. As a teenager, he developed an interest in the hobby when he began hanging out at Compton's Fix It Shop in Louisa. "Mr. Compton always seemed busy fixing things in his shop," said Jones. "He could weld anything back together; he repaired appliances, fixed lawnmowers and even built Ham Radios. More than that, he was a great individual who taught me how to build radio receivers and transmitters; he even showed me how to construct antennas. He had quite an elaborate Ham Radio setup in his house and my first visit to his well-equipped radio room had me committed to be a licensed Ham Radio operator with my own station." Before Jones graduated from Louisa High School in 1963 he had already passed the examination for his Ham Radio License. His father helped him get started but the majority of his expenses for this hobby were paid by working as an evening radio police dispatcher for the Louisa police department on Saturdays. He also delivered groceries for Louisa Cut Rate Supermarket using his bicycle. After he passed his driver's exam, he drove the 1951 Chevrolet store delivery truck.

### **Next Steps on the Road to WRC19:**

by RSGB on October 7, 2018

IARU volunteers have been working for three years to progress World Radio Conference 2019 Agenda Item 1.1, which seeks a Region 1 allocation at around 50MHz for the Amateur Service in the Radio Regulations Table of Frequency Allocations, to align with the allocations in Regions 2 and 3.

### **Special Event Callsigns for the Centenary of the Armistice:**

by WIA on October 7, 2018

Apply today for your opportunity to use the State and Territory special event callsigns for the Centenary of the Armistice that ended World War One. As is well-known, many radio amateurs played a key role in wartime communications. To show respect, the WIA has secured Special Event callsigns for use across all Australian States and Territories. These commemorative callsigns will be much sought after on-air, throughout the world.

### **VK6WIA NewsWest for 7 October 2018:**

by WA Amateur Radio News on October 6, 2018

In today's broadcast, we bring you: News from the NZART, along with Promotion of the November VKFF Activation Weekend.

### **Gwinnett Amateur Radio Operators to Conduct Annual Emergency Test:**

by ajc.com on October 6, 2018

Gwinnett County Amateur Radio Emergency Service (ARES) operators will participate in the annual nationwide ARRL Simulated Emergency Test Oct. 6. The ARES group will join members of the National Traffic System to provide emergency communications from all over Gwinnett. This year's scenario will be a coastal hurricane with evacuees fleeing inland. Mobile ham radio operators will be communicating shelter and hospital needs. Several shelters will be set up as well as the county's emergency operations center. Gwinnett hospitals will be staffed with amateur radio operators at the hospitals' permanently installed ham radio stations.

### **PR CERT Meets at Emergency Ops Center, Travis, to Plan Ham Emergency Test:**

by silive.com on October 6, 2018

Port Richmond CERT leaders met Thursday night at the team's Emergency Operations Center, Travis, to plan to take part in the American Radio Relay League's Simulated Emergency Test this weekend. PR CERT members with a ham license have been asked to check in on the team net at least once on Saturday or Sunday. Team members that don't check in will be visited by other team members. The exercise will allow the team to practice how members will contact one another in a disaster involving downed phone systems. PR CERT will provide "Ready New York" emergency preparedness information at various fairs throughout Staten Island in October.

### **Foundations of Amateur Radio #174:**

by Onno VK6FLAB on October 6, 2018

One topic that is longer than all other topics combined is that of antennas. Designing, planning, sourcing, building, tuning, using, you name it, all of this is regular fare in the day of a radio amateur. I've discussed the topic here regularly and no doubt I'll revisit that when the mood or necessity takes me.

### **Out of This World: Pell Students Chat with Astronaut:**

by newportri.com on October 5, 2018

NEWPORT -- Pell Elementary School became the first public school in Rhode Island to have a conversation with an astronaut aboard the International Space Station -- with an invaluable assist from a ham-radio operator in Belgium. Timing was critical to make the connection. The school relied on the operator, Jan Poppeliers, to call the station as its orbit passed over Europe around 1:45 p.m. Tuesday. With the station about 250 miles up in the atmosphere and cruising at about 18,000 mph, there was a roughly 10-minute stretch when it would be within range of Poppeliers' location in Aartselaar. The contact was made possible by the global Amateur Radio on the International Space Station (ARISS) program that was launched in 2000 and promotes STEAM (science, technology, engineering, art and math) education. All Saints Academy in Middletown engaged in a similar conversation with an astronaut on the station in 2016, and Bishop Hendricken High School in Warwick did so the following year.

### **The 180-Year Evolution of Dits and Dahs:**

by markets.businessinsider.com on October 5, 2018

No one thought that 180 years later, Samuel F. B. Morse's invention of Morse code would still be relevant, especially considering one of the hottest tech companies on earth has added a Morse code keyboard to their smartphones. This company also offers free training on how to learn the language in less than an hour. In times past, students vocalized the written dots and dashes of this language as "dits" and "dahs," respectively. As it has evolved, Morse code beeps are also communicated with flashing lights and blinking eyes. Brandon Frere, Frere Enterprises CEO and industry leader, believes entrepreneurs can learn from Morse code's origin story to stay relevant in the future.

### **SEQUOYAH: Agencies Tested on Preparedness:**

by clevelandbanner.com on October 5, 2018

Nearly every seat in the Bradley County Emergency Operations Center was filled Wednesday during an emergency preparedness graded exercise involving the Sequoyah Nuclear Plant. Jeff Gunter, operations officer for the Bradley County Emergency Management Agency, explained the drill scenario: that the area surrounding the nuclear plant was under a general emergency and that Ocoee Middle School would be opened as a shelter. Of course, there was no real emergency but the drill highlighted the importance of being prepared in case one occurs. In addition to officials from the Federal Emergency Management Agency, Tennessee Emergency Management Agency, Tennessee Valley Authority and various local organizations, McMinn County EMA Director Tom Trotter and fixed nuclear facility planner Cameron Balaban were also present to observe. Eric Blach with Bradley County EMS noted that routine calls will still be occurring in the event of an emergency related to Sequoyah. As part of the drill, they went through the plan to call in all needed personnel and make sure they have all the equipment they need in the event of an actual nuclear emergency. Ham radio operators David Benton and Doug Forquer, both with Bradley County Auxiliary Communications Services, said in the event of an emergency the estimated 1,700 ham radio operators in the county would volunteer to help. They said when telephone service is down, ham radios are an effective communication tool. Benton said 78 ham radio operators had checked in to the network for the drill; 12 are available to be deployed to shelters and evacuation points. "We're here," Benton said. "We hope you don't need us, but we're here."

### VY0ERC, NA-008, Oct 17-Nov 10, 2018:

by Alex VE1RUS on October 4, 2018

VY0ERC will be QRV from October 17 until November 10, 2018 from Eureka, NU (NA-008). Expect activity on 40, 20 Meters and hopefully 80m in SSB, Digital and CW when time and weather permitting.

### ARRL, FCC Discussing Issue of Uncertified Imported VHF/UHF Transceivers:

by The ARRL Letter on October 4, 2018

ARRL has taken a minor exception to the wording of a September 24 FCC Enforcement Advisory pertaining to the importation, marketing, and sale of VHF and UHF transceivers and is in discussion with FCC personnel to resolve the matter. The Enforcement Advisory was in response to the importation into the US of certain radio products that are not FCC certified for use in any radio service, but identified as Amateur Radio equipment.

## Repeater Nets

**146.955 Nets – There are a number of nets that are regularly scheduled on the 955 repeater.**

- Sunday night at 2000/8:00 PM [Sunday Night PART Net](#) – every
- [Sector 1C Emergency Communications Net](#) – this net occurs the 1<sup>st</sup> Monday or every month (except when it is a holiday).
- [Skywarn and ARES Nets](#) – these nets are spontaneous when local conditions warranted.

NOTE: You can LISTEN ONLY to this repeater audio by linking to this URL:

<http://www.radioreference.com/apps/audio/?feedId=10933> (effective 2/2012)

**442.450 D-Star Nets – There are a number of nets that are regularly scheduled.**

- Sunday 8:00 PM [Ozark Mtn D-STAR Net](#) – Reflector 001C
- Tuesday 8:00 PM [New England Amateur D-STAR Net](#) – Reflector 010C
- Friday 8:00 PM CanNet D-Star Net – XRF021B

NOTE: The status of the WB1GOF D-Star repeaters can be seen at <https://wb1gof.dstargateway.org>

Not sure if you are aware that there is a W. Middlesex ARES group that has been on for a few years. The station has two VHF/UHF rigs and antennas which is located at the new Stow Fire Station. It is a simplex net on the second Tuesday of the month on 147.435 MHz, 110.9 Hz tone.

Robert Schmeichel  
2011

## Monthly PART Breakfast

### NEW Venue - Paul's Diner

From a recent President's Column: "The event will be moved to Paul's Diner in Westford starting on Saturday, March 3rd, 2018. The event will still begin at 8 AM, and we'll meet in the back room of the restaurant. Each person will order from the [menu](#), as there is no buffet at this restaurant."

Paul's Diner is located at 6 Carlisle Rd in Westford, MA 01886.

Directions to Paul's Diner can be found at this link:

<http://www.paulsdiner.com/Directions>

## CQ WW Contest Dates

SSB: October 27 - 28, 2018

CW: November 24 - 25, 2018

Starts: 0000 UTC Saturday

Ends: 2359 UTC Sunday

**PARTicles - October 2018**

## Repeater Information

### Repeater Interference

The 146.955 repeater periodically has had interference to in-progress conversations as well as at random quiet times throughout the day and night. The repeater interference committee needs your help in collecting data. If you hear any type of interference, please report the following info to **"repeater" at "wb1gof.org"**:

- Time: When did the event happen?
- Observing location: Where were you? Were you mobile?
- Frequency: Input only (146.355 MHz)
- What you heard: Voices, tones, kerchunking or whatever.
- Signal strength: Either by ear (noisy, quiet or full quiet) or S meter
- Radio: To get an idea of the reporter's radio situation.

\* Most important - what direction: How did you determine direction? This is the most essential piece of information. Even if it's an estimate as in "Roughly east" or "from the Northeast" it's useful. NEVER EVER reply or direct any thing to the sick person causing the interference. Because some of us have answered this person, he knows we are aware of him and that is what keeps him doing it. Also since you are communicating with a non IDing station you are operating just as illegally as he is. YOU ARE BROADCASTING! NEVER TALK ABOUT INTERFERENCE on air. NEVER

*If you are interested in assisting in helping us identify the sources of interference, contact Terry-KA8SCP.*

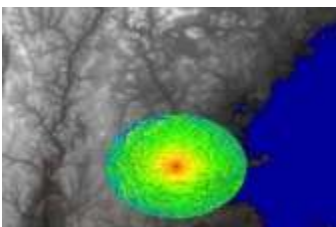

### EmComm events and repeater use

Most everyone knows that the 146.955 repeater is used during times of emergency situations, drills and exercises. Skywarn and the monthly EmComm drills are the normal events.

So what does this mean to those that are just looking for regular QSOs with other users? It means that if you are in a regular QSO and there is a significant weather situation that has been getting press/air-time lately, you can expect that if severe weather develops in our area, the folks from Taunton-WX1BOX may interrupt a QSO and ask anyone on frequency what may be happening weather wise. The BOX operator will probably ask for specific information, hail, wind damage, property damage from lightning or wind, etc. Please give him the information he needs or tell him that you've not heard of any such activity. You don't need to tell him it is sunny in Nashua!

There may come a time when an unexpected emergency situation arises. These will be significant events that may affect life and property. This is where EmComm activity may step in. Usually an NCS will interrupt a QSO and announce the situation and ask for a QSO to cease or to be "aware" of the possibility of priority calls/traffic. Please make sure you leave breaks between transmissions so stations with traffic can get in between QSOs. If there is enough traffic, it may be necessary for your existing/interrupted QSO to QSY to another frequency. You should use your best judgment or check with the NCS on what he feels is best.

If you have any questions, please feel free to correspond with Terry-KA8SCP. All requests for repeater use can be initiated by email to [info@wb1gof.org](mailto:info@wb1gof.org).

**R**epeater propagation info is available on the PART [website](#). Check out the links to the summit information as well as coverage and plot plans maps for the WB1GOF repeaters. Complete info on the site can be found at this [URL](#).

## PART Gear

The PART Quartermaster has lots of great PART-ware for sale including mugs and shirts. You can get information how you can obtain your PART-ware at the monthly club meetings.

Club members are also encouraged to obtain an official PART badge (the first one is FREE to new members). We use The Sign Man of Baton Rouge as our official supplier, and you can browse the club's design at:

<<http://thesignman.com/clubs/part.html>>. However, please place your order via the PART Membership Chairman, Hugh Maguire-N1QGE, [hulin127@verizon.net](mailto:hulin127@verizon.net) so that we may benefit from bulk pricing.

## EmComm

**Emergency Communications** – The WB1GOF 146.955 repeater is used on the first Monday of every month (except federal/state holidays) for an EmComm Net starting at 1930 local time. If you are interested in being part of the local emergency communications team in your community, feel free to contact any of the following folks:

Terry Stader – KA8SCP, MEMA Region 1 Communications Officer & Town of Westford

Bill Ohm – W1OHM, for the Town of Chelmsford

Darrel Mallory – K1EJ, North Middlesex ARES

- We need radio operators that can pass messages on to the local emergency management directors in several towns in northern Middlesex County.

**Skywarn** - The WB1GOF 146.955 repeater is also used for reporting significant weather events to the National Weather Service from our local spotters. You can provide valuable information even if you have not attended one of the training sessions. Listen to the Skywarn Net Control Station for reporting criteria, when you have information that qualifies, please advise him with your report.

**Situational Awareness** – Recently, the Massachusetts Emergency Management Agency has asked the Amateur Radio community to provide situational awareness and disaster intelligence information within your local community via EmComm nets and/or Skywarn stations. Significant events such as widespread power outages can be reported and by agencies such as MEMA to evaluate the scope of a blackout for example. Initially, you should try and contact the EmComm Net Control Stations on the Westford 146.955 repeater to pass this information. More on this new program will be forthcoming.

**PART Sunday Night Net** – The PART Net each Sunday night is an IMPORTANT part of our regional EmComm function. With each station that checks in from the surrounding communities, we test our ability to communicate vital information to the ham radio community. Sure we announce club info but we can also communicate regional disaster news and serve as a “hub” for news of situations in our communities. The repeater is on a generator, so even if we loose power in the region, an HT with a supply of batteries will reconnect you to other local hams.
